

BENPOSER

PYTHON DEVELOPER

📍 London benjohnposer@gmail.com Github: <https://github.com/BenPoser>

I am looking to start a career as a programmer, over the past year I have been taking online courses in Python, HTML5, CSS3 and how to use GitHub. Working as a tutor has developed my communication skills and afforded me the time necessary to complete these courses. Programming has been a natural fit for my skillset and complements my background in Maths, Physics and Philosophy. I have always enjoyed learning and am excited to have found a way to continue learning new and exciting things. I am a highly logical thinker and take great pleasure in finding solutions to problems.

PROGRAMMING

Web

HTML5 / CSS3 / Bootstrap

Python

PyMongo / Web.Py / Beautiful Soup

Matplotlib / pandas / NumPy / JSON

Virtualenv / Pyaudio / speech_recognition

SOFTWARE

Mongo DB

Robo 3T

Adobe Photoshop

Ubuntu

Microsoft Office

Open Office
